

at Coastal Kids Home Care

Papillon Center for Loss & Transition is a central source of information on community resources for grief and loss. A range of services are available from written resources, bereavement groups in-person or via zoom, and one on one counseling for children and teens. For more information please refer to our website www.coastalkidshomecare.org/papillon-center.

Bereavement Groups

At Papillon, we believe connecting to others who have experienced loss can offer comfort. The program offers specific groups for adults, those with complex grief and parents who have experienced child loss.

Individual Bereavement Support (for Children and Teens)

For individuals coping with loss, Coastal Kids Home Care offers support through one-on-one grief counseling. Options include in-person or telehealth counseling.

Grief Resources

Each person who reaches out to Papillon Center for Loss & Transition has access to informational resources appropriate to their grief. We are also honored to be home to the Madison Rose Memorial Library, a wealth of books reflecting differing experiences of grief and loss.

Outreach and Special Projects

Papillon facilitators and counselors are available for outreach events on grief and bereavement. Throughout the year we also host special gatherings to bring together our participants as a community.
